Create UI Challenges

Flutter Forward Extended 2023

Motivation

One of the main things you'll be confronted with throughout your mobile career is creating user interfaces for mobile applications, you'll be doing a lot of that! That's why, in order to get you used to it, we thought we'd provide you with some activities like this. Have fun bringing the design below to life!

Description

you see this application?, it's obviously a schedule management system application, a very useful challenge to sharpen all your UI skills, your challenge is to build out this three screens and the "done" window and get it looking as close to the design as possible, Feel free to use any workflow that you feel comfortable with

Expectations

- toggle the necessary interaction and navigation between the three screens
- display the days of the whole month (you can use any package)
- Take into consideration providing a smooth animation in the necessary places (profile image animation)

- Keep in mind that you will be evaluated on the cleanliness of the code and structure of the files you provide.
- Work only with the provided assets

Assets

the necessary assets for the challenge have been provided in the directories labeled **'/assets'**
