Dinosaur Game

Flutter Forward Extended 2023

Motivation

Once we can't connect to the internet, we all have played the dinosaur game, and in this challenge you will be building your own version of this game.

Description

The challenge requires participants to create a loop game using Flutter, similar to the popular Dinosaur Game. The game should be designed to be played on a mobile device and should incorporate the assets provided in the given packages.

The game should feature a character that the player must guide through obstacles by jumping over or dodging them. The player should be able to control the character's movements by tapping on the screen.

The game should have a scoring system that tracks the player's progress and rewards them for reaching certain milestones.

The game should also have a history system for tracking high scores and displaying them to the player.

Expectations

- Building a functional game using Flutter.
- Demonstrating good coding practices

Assets

the necessary assets for the challenge have been provided in the directories labeled **'/assets'**
