Create UI Challenge
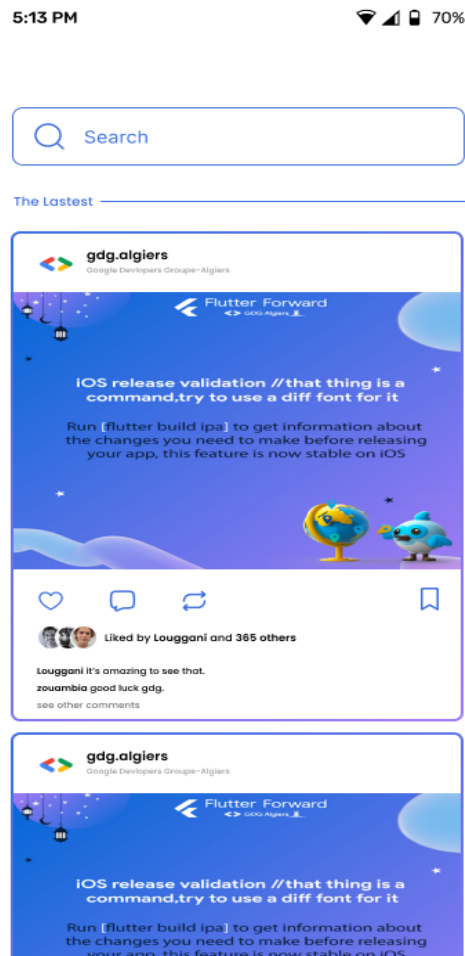

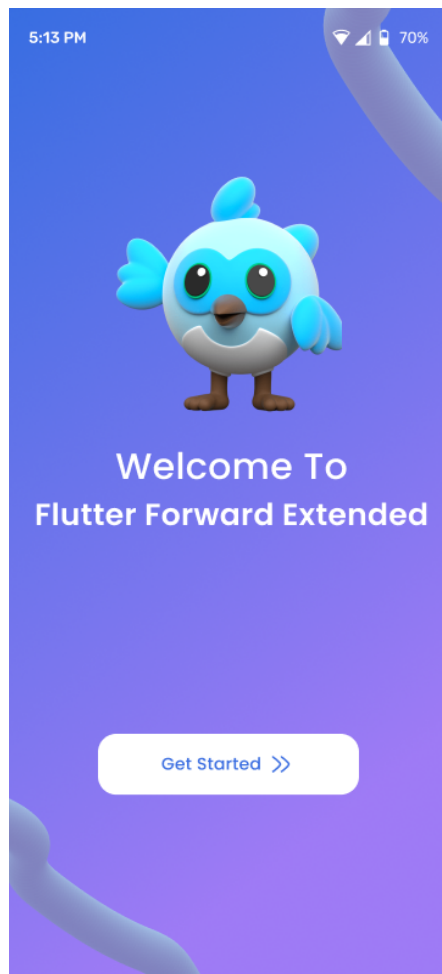

Flutter Forward Extended 2023

Motivation

Learning mobile development is becoming more and more crucial for individuals as the demand in this field is increasing exponentially day by day, and what better way than to learn an easy open source framework, Flutter, which will certainly help any enthusiast to develop powerful and efficient applications and thus build a flourishing developer career.

Description

Here we are trying to create an adaptive user interface for our mobile app, something crucial for any mobile developer,
As you can see, we have a social media app UI with two screens, the first one is a home screen that displays 5 simple elements, the second one is a feed page that contains more features:

- the last published post
- icons for reactions, comments, shares and a save button.

Expectations

- Develop this mobile application with both screens
- Create interaction and navigation between the two screens.
- You are not allowed to use other resources than those shared with you.

Assets

the necessary assets for the challenge have been provided in the directories labeled **'/assets'**
